DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 1 is rejected under the judicially created doctrine of double patenting over claim 1 of U. S. 6,594,346 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Art Unit: 2645

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

US 6,594,346, recites limitations which are substantially the same and broader in scope as recited in the claims of the instant Application. For example, US 6,594,346, Claim 1, recites "transmitting both the digital text message stream and the voice of the hearing user by telephone connection to the assisted user". The instant application, claim 1, recites "transmitting both the digital text message stream and the voice of the hearing user over the single telephone connection back to the personal interpreter of the assisted user." It is obvious that the claimed "single telephone connection" in the instant application is included in the "telephone connection" of the patent.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Engelke et al. (US 5,724,405) teach a relay which transmits voice and text over a common telephone line.
